

ASX RELEASE | 12 MAY 2026

Amended Corporate Presentation

Tartana Minerals Limited (ASX: TAT) (Tartana or the Company) provides the enclosed amended Corporate Presentation first released on 23 April 2026.

The amendments include:

- a revised competent persons statement and cross-referencing of previous disclosures by the Company;
- a retraction of certain images which may have included visual observations of mineralisation without the requisite cautionary statement and other supporting disclosures;
- a retraction of a statement which could have been read as a production target (noting that such a reading was not intended); and
- other clarifications.

ENDS

This announcement has been approved by the Managing Director of Tartana Minerals Limited (ASX:TAT).

About Tartana Minerals (ASX:TAT)

Tartana Minerals Limited is an Australian explorer and project developer with a substantial landholding in the Chillagoe region of Far North Queensland. The Company's portfolio comprises mining leases and exploration tenements prospective for critical and strategic metals, including silver, copper, gold, antimony, zinc, and tin.

Tartana holds the Tartana Mining Leases, from which it produces copper sulphate, supporting ongoing operations while advancing exploration and development across its broader asset base.

The Company's strategy is to enhance shareholder value through systematic exploration, disciplined project development and the expansion and optimisation of its production activities.

The logo consists of four stylized, overlapping shapes: a yellow one at the top, an orange one below it, a red one to the left, and a green one at the bottom, all pointing towards the center.

DISCLAIMER

The material in this presentation (Material) is not and does not constitute an offer, invitation or recommendation to subscribe for, or purchase any security in Tartana Minerals Limited (ASX: TAT) (ACN 111 398 040) nor does it form the basis of any contract or commitment. In the event that an offer, invitation or recommendation to subscribe for, or purchase any security in TAT is made in the future, an Offer Document will be made available in relation to the same. If and when the Offer Document becomes available, it may be downloaded from the TAT website at www.tartanaminerals.com.au. At that time, any person wishing to make an investment in TAT must consider the Offer Document in deciding whether to acquire the security and must complete the application form that will be in or will accompany the Offer Document.

TAT makes no representation or warranty, express or implied, as to the accuracy, reliability or completeness of this Material. TAT, its directors, employees, agents and consultants shall have no liability, including liability to any person by reason of negligence or negligent misstatement, for any statements, opinions, information or matters, express or implied, arising out of, contained in or derived from, or for any omissions from this material except liability under statute that cannot be excluded.

Statements contained in this Material, particularly those regarding possible or assumed future performance, costs, dividends, production levels or rates, prices, resources, reserves or potential growth of TAT, industry growth or other trend projections are, or may be, forward looking statements.

Such statements relate to future events and expectations and, as such, involve known and unknown risks and uncertainties. Actual events and results may differ materially from those expressed or forecasted in forward-looking statements due to a number of factors. The principal important risk factors that could cause TAT's actual performance and future events and actions to differ materially from such forward-looking statements, include, but are not limited to, continuing volatility in the capital or credit markets and other changes in the securities and capital markets, changes in market prices of TAT's investments, the occurrence of one or more catastrophic events, such as an earthquake, cyclone, or act of terrorism, changes in laws or regulations, changes in income tax laws, and changes in general economic and market factors that affect the prices of securities or the industries in which it does business.

This Material includes certain statements, estimates and projections that rely upon various assumptions. Those assumptions may or may not prove to be correct. The Material does not purport to contain all the information that a prospective investor may require. The information may not be appropriate for all persons, and it is not possible for TAT to have any regard to the investment objectives, financial situation and particular needs of each recipient who reads or uses this information.

QUALIFYING STATEMENT

The information in this Presentation that relates to Exploration data, Exploration Target and MREs are based on information compiled by Dr Stephen Bartrop who is a Fellow of the Australian Institute of Geoscientists and a Fellow of the AusIMM. Dr Stephen Bartrop, Managing Director of TAT, has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the JORC Code. Dr Stephen Bartrop is full-time personnel of TAT and consents to the inclusion in this announcement of the Exploration, Resource and Metallurgical Information in the form and context in which it appears.

The Company confirms that it is not aware of any new information which would materially affect the information presented. In relation to historical exploration information and commentary that does not relate to exploration conducted by Tartana, the Company notes that these were not reported to a JORC 2012 standard however the Company believes that such exploration information disclosed does reliably reflect the exploration findings at that time, and the Company has no reason to believe that those results may be unreliable. A list of announcements is provided in Appendix 2.

Poised for Growth

The \$4.5 million capital raising led by Alpine Capital is a transformational event which enables the Company to:

- Accelerate drilling of priority exploration projects as well as increase existing Cu-Zn-Au resources
- Increase copper sulphate pentahydrate production and reliability by loading copper mineralised pit fill onto the existing heaps and replacing the chiller system

It will assist in developing an asset base second to none in Far North Queensland!

- Existing Copper Production (in the form of copper sulphate)
- Copper production growth – potential production of copper concentrate using the Mungana processing plant
- Copper inferred and indicated resources – 45,000 t¹ contained copper with drilling planned to potentially increase this to > 100,000 t contained copper (on mining lease)
- Zinc inferred resources – 39,000² contained zinc and open at depth (on mining lease)
- Gold inferred resources - 1 Moz³ across the Mountain Maid and Cardross gold projects with a further Exploration Target at Cardross
- Nightflower Project with significant Silver-Lead-Antimony Exploration Target
- One of the most extensive tenement positions in Far North Queensland with tin, tungsten, antimony and rare earths.
- Dynamic management which has been focused on aggregation and position – now focused on delivery and telling the story!

1. No material changes known since ASX announcement dated 9 Feb 2023
2. No material changes known since ASX announcement dated 14 Feb 2023
3. No material changes known since ASX announcement dated 30 Oct 2025

Copper Production – Copper Sulphate Pentahydrate

- Refurbished an existing heap leach – solvent extraction plant for producing copper sulphate pentahydrate
- US\$3.7 M revenue to-date generated over 18-month period
- High operating cash margin (>40%)
- Offtaker Kanins International selling copper sulphate into the North Queensland mining industry (used in zinc mineral flotation)
- Price directly related to LME copper price plus premium
- Production in the 2H CY2025 lower due to lower grades feeding plant.

Copper sulphate crystallisation in one of the chillers, Transporting copper sulphate in bulka bags, Production and Revenue since May 2024

Copper Sulphate Pentahydrate – Increasing Production

- Pit fill discovered to be mineralised with some extractable copper grades above 0.5% Cu¹
- Mining of 50,000 tonnes of pit fill and stacking on the on the leach pad has now been completed and leaching is commencing. This will boost available copper in the ponds for copper sulphate pentahydrate production
- New Chiller has been fabricated with installation over the next two weeks. This will create increased efficiencies and lower operating costs

Test Pit	Interval (nth meter)				Bulk	Average	Std Dev %	Extracted Grade (w/w)
	2	3	4	5				
2		36.7	45.8			41.3	11%	0.07

Average								0.22

1. and above. Leachable copper grades in sampled area of pit fill. See ASX announcement dated 4 March 2026

Copper Production Growth – Copper in Concentrate

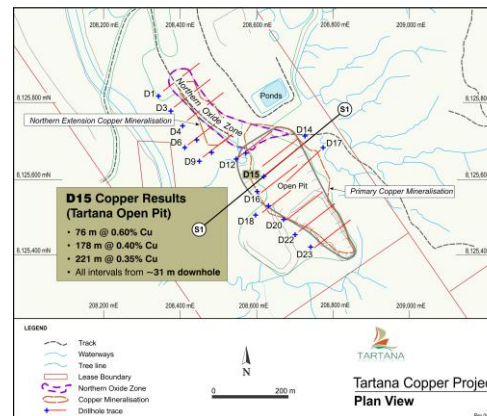

- Feed grade – 0.75 – 0.9% Cu with ore sorting
- +1 Mt Indicated Resource with scope to convert to reserves
- Work completed to-date:
 - Open pit optimization studies
 - Open pit mine plan
 - Initial waste rock dump design
 - Tomra ore sorting testwork
 - Copper flotation testwork

Investigating processing options

- Toll treating at Mungana
- Standalone Plant at Tartana

Advantages/disadvantages with both

Tartana Copper Mineral Resource (Inferred and Indicated). See ASX announcement dated 9 February 2023. No Material Information known that would lead to a change in the resource estimates.

Resource Category	Zone	Tonnes (Kt)	Cu Grade (%)	Density (t/m ³)	Contained Cu (t)
Indicated	Transitional	1,563	0.51	2.63	7,972
Inferred	Oxide	152	0.34	2.63	518
Inferred	Transitional	1,252	0.47	2.63	5,884
Inferred	Fresh	7,072	0.43	2.63	30,407
Total		10,039	0.45	2.63	44,781

Exploration targeting Cu, Au, Ag, Sb, Sn W

Designed drill targets comprising 21,000 m across the following project areas.

Project/Prospect	Prospective Element(s)	Status
Nightflower	Silver, Lead, Zinc, Antimony, Gold	<i>Digger Lode:</i> Exploration Target released for Digger Lode of 2.75 Mt @ 364 g/t Ag Eq for 32 Moz Ag Eq to 5.36 Mt @ 270 g/t Ag Eq for 47 Moz Ag Eq, based on rock chip sampling, previous drilling and a previous JORC 2004 resource estimate for the Digger Lode. The Exploration Target is conceptual in nature, with no certainty that further exploration will result in the definition of a resource (further information in ASX Release 27 February 2026). <i>Terrace Prospect:</i> Drilling is planned to test an 800 m long IP anomaly interpreted to represent a southern extension of the Digger Lode. 6,500m of drilling designed. Targeting completion in 2026.
Beefwood	Copper, Gold	Designed program of 5,000m with an initial CEI Grant approved with Queensland Government providing \$275,000 to finance the drilling of a single 800m hole (see ASX announcement dated 31 March 2026)
Tartana Mining Leases	Copper, Zinc	Granted mining leases. Actively producing copper sulphate pentahydrate with drilling to expand existing primary copper resource. Indicated and inferred Mineral Resource Estimate of 45,000 tonnes contained copper at 0.45% Cu using a 0.2% Cu cut off (further information below). Designed program of 5,400m aimed at expansion and upgrade of the Mineral Resource Estimate >100,000t contained copper. Additional inferred Mineral Resource Estimate at Queen Grade 39,000t contained zinc at 5.29% Zn using a 0.5% Zn cut off excluding silver and lead credits (further information below). (see ASX announcements dated 9 and 14 Feb 2023)
Mountain Maid	Gold, Tellurium, Bismuth	Mineral resource estimates of 591koz contained gold at 0.25g/t Au at 0.1g/t Au cutoff at Mountain Maid (inferred) (further information below). Designed program of 1,300m drilling aimed at upgrading mineral resource estimate in tonnage and confidence as well as further investigations for Tellurium, Bismuth. (see ASX announcement dated 30 Oct 2025)
Ok Mines and Bellevue District	Copper, Gold, Zinc	Region encompasses historic copper mine and smelter with extensive historical workings. Past drilling has intersected mineralisation at depth and there are several targets in the area identified from IP. Designed program to initially test 1,700m of satellite deposits around Ok Mines. Region encompasses historic copper mine and smelter with extensive historical workings. Past drilling has intersected mineralisation at depth and there are several targets in the area identified from IP. (see ASX announcement 20 July 2021)
De Wett	Tin	Parallel vein system ranging in width from 0.5 m to 1.0 m grading 1 % to 5 % Sn. Communication with previous miner advised historical mined grades and mineralisation continuity at depth Designed drill program of 985m. (see ASX announcement 8 Oct 2024)

Drill Rig Purchase Provides Flexibility and Cost Savings

UDR 650 purchased to achieve 2026 drilling targets

Purchase triggered by:

- Availability of low cost, versatile, truck-mounted rig capable of diamond core, reverse circulation (RC) and air core drilling
- Experience lead driller within the Tartana team
- The creation of flexibility in project drilling where positive assay results can be followed up immediately
- Drilling unit cost savings

What this means? News Flow!

Drilling will commence in early May on the Tartana Copper Project and then progress to silver, tin/tungsten and antimony projects. Later drilling at Cardross/Maid and OK gold/copper projects.

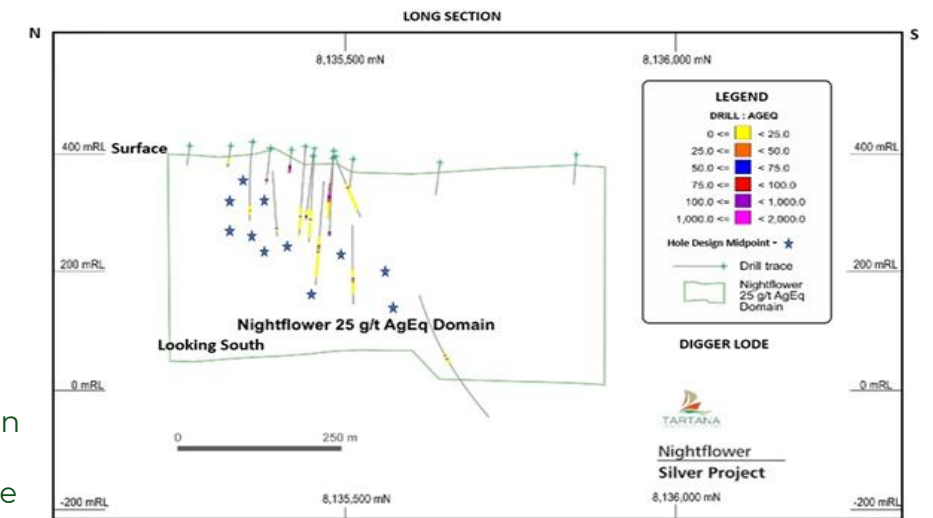

UDR 650 rig conducting RC drilling at Tartana Copper Project

Nightflower Silver – Antimony - Lead

- High grade silver-lead-zinc-antimony lodes outcropping at surface
- IP anomalies indicate two defined target zones; Digger Lode and Terrace Prospect.
- Historical drilling includes high grade antimony intersections e.g., 3.05m @ 9.0% Sb, 24.0% Pb, 10.5% Zn, 14.9 oz/t Ag, and 0.38% Cu (Hole NF72DD11).¹
- Exploration target estimated 2.75 Mt @ 364 g/t Ag Eq for 32 Moz Ag Eq to 5.36 Mt @ 270 g/t Ag Eq for 47 Moz Ag Eq. For the Digger Lode only. Note: The Exploration Target is conceptual in nature only and there is no guarantee that further exploration will define a resource. (See ASX announcement dated 9 September 2024).
- See Appendix 1 for Metals Equivalent calculations. (Ag Eq = Ag (g/t) + 65 x Au (g/t) + 95 x Cu (%) + 10 x Zn (%) + 25 x Pb (%) + 102 * Sb (%))

Digger Lode proposed drilling in plan and long section. Axiom reported a JORC 2004 resource which forms the basis of the Exploration Target

¹. See Axiom Sept Quarterly 2008 dated 31 October 2008)

Beefwood Copper-Gold

- Geophysical and geochemical anomalies identify potential large scale mineralised targets under cover sediments
- Falcon Gravity/Magnetic survey completed by Tartana confirm large Copper/Gold and REE targets associated with igneous intrusions
- Geochemical support for some targets including by anomalous gold and indicator metals at surface (up to 282 g/t Au)
- Strategic Energy Resources (ASX:SER) entered into Joint Venture with Sumitomo on neighbouring ground (ASX 19 January 2026)
- Single 800 m drillhole planned to test main target – scheduled for mid 2026
- Recently awarded 2026 CEI Grant round 10 to finance drilling (\$275,000 Grant)

Mountain Maid and Cardross Gold-Copper

Mountain Maid Gold

- Maiden inferred mineral resource of 591,573 oz contained Au in 76.3 Mt at 0.25 g/t Au using a 0.1 g/t Au cut off grade
- Potential by-product credits from Ag, Cu, Mo, Bi, Te and Sb
- Scope for Tomra ore sorting to upgrade gold grade and other metals
- Drilling to the south which is open and with most southerly drilling having the following intersections:
 - 19 m @ 1.30 g/t Au from 34 m (MMRC050)
 - 16 m @ 1.28 g/t Au from 50 m (MMRC041)

Cut Off Grade g/t	Tonnes Million tonnes	Gold Grade g/t	Contained Gold oz
0.1	73.6	0.25	591,573
0.2	38.0	0.34	415,387
0.3	16.7	0.45	246,932
0.5	5.3	0.62	112,463

Maid Resource at various cut-off grades. Kaolin alteration over part of the Maid resource, Tourmaline veining in quartz

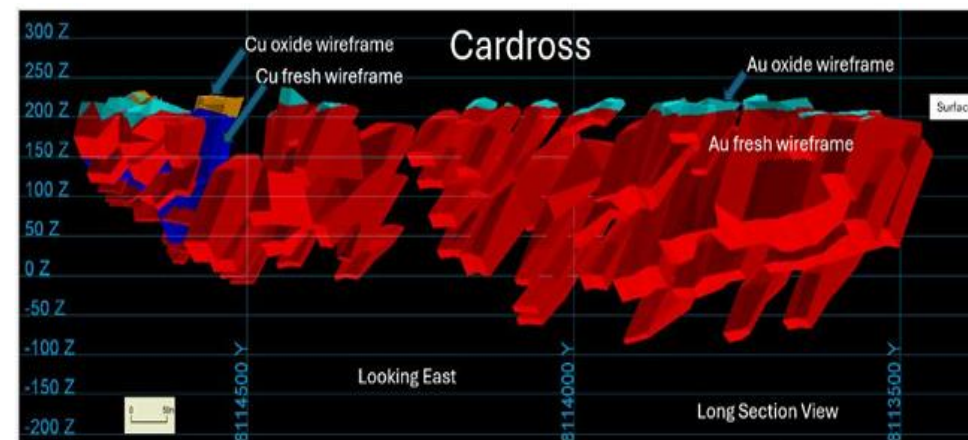

Mountain Maid and Cardross Gold-Copper

Cardross Gold-Copper

- Maiden Inferred Mineral Resource Estimate (MRE) estimated at 50.4 Mt at 0.31 g/t Au for 502,323 oz at 0.1 g/t Au cutoff
- Mineralisation associated with sulphides and remains open at depth and along strike
- Excludes potential copper, silver, minor metal and rare earth credits due to incomplete data but historical drill intersections include drillhole CAO6DD02 which intersected 6 m @ 3 g/t Au, 4.8% Cu and 90 g/t Ag
- Additional Exploration Target Range of 23 to 72 Mt at 0.2 – 0.3 g/t Au for 0.22 to 0.46 Moz Au extending 2.2 km southwest. Note the Exploration Target is conceptual in nature only and there is no guarantee that further exploration will define a Mineral Resource Advanced
- Mining Lease Application

Takes total inferred resource at Mountain Maid and Cardross to over 1 million oz contained Au with further exploration upside

Cut Off Grade g/t	Tonnes Million tonnes	Gold Grade g/t	Contained Gold oz
0.1	50.4	0.31	502,323
0.2	40.6	0.34	443,809
0.3	22.8	0.42	307,875
0.5	4.3	0.62	85,714

See ASX announcement dated 14 Feb 2023

Ok Mines and Bellevue District – Copper-Gold

Ok Mines Copper Gold

- Historic copper mine with smelter and township.
- High grade intersections indicate orebody remains open at depth. E.g., 24.4 m @ 2.04 % Cu and 0.59% Zn (DD10)¹
- Nearby targets include Ok North, West and South – all with up to +5% Cu in rock chips at surface

Bellevue District Prospects

- Tartana Minerals flew detailed Falcon gravity/magnetics to assist in prioritizing targets
- More than 10 copper-gold prospects identified with most significant being Mitchell Surprise

Ok Mine and Smelter ruins, Proposed drilling (green) to test gossan outcrops at the Ok North Mine. Core from OK07DD018 showing mineralisation from historical Axiom drilling¹,

¹. See R3D Resources Prospectus dated 26 May 2021

Note Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analyses where concentrations or grades are the factor of principal economic interest. Visual estimates also potentially provide no information regarding impurities or deleterious physical properties relevant to valuations. (see ASX announcement dated 20 July 2021)

Daisy Bell Tin Project

- Tin and tungsten mineralisation present in a 6 - 10 m wide greisen zone and overlying greisen cap.
- Greisen dyke is continuous for a least a 2 km strike with cassiterite evident in a greisen outcrop in a road cutting.
- Historical drill intersections include¹:
 - 7.6 m @ 1.25% Sn, & 0.3% WO₃ from 32.0m (Hole 2)
 - 4.6 m @ 0.84% Sn, & 1.77% WO₃ from 30.5m (Hole 3)
 - 12.2 m @ 0.34% Sn, & 1.01% WO₃ from 47.5m (Hole 4)
 - 10.7 m @ 0.73% Sn, & 0.12% WO₃ from 22.9m (Hole 5)
 - 13.7 m @ 0.90% Sn, & 0.24% WO₃ from 27.4m (Hole 7)
 - 13.7 m @ 1.46% Sn, & 0.48% WO₃ from 36.6m (Hole 10)
 - 10.7 m @ 0.47% Sn, & 0.10% WO₃ from 19.8 m (Hole 11)
- Potential scale significant scale given strike length and width and with drilling targeted in the 2026 field season.

1. See ASX Announcement dated 18 October 2024

Daisy Bell open cut with exploratory shaft headframe still intact

Dominant Exploration Position in Far North Queensland

- Our tenement position covers more than 2,350 km² and includes:
 - 8 Granted Mining Leases & Applications
 - 19 Granted EPMs
 - 3 EPM Applications

Three Exploration/Development 'plays' emerging:

- Our priority **Chillagoe copper-gold projects** including Tartana, Cardross, Mountain Maid, Bellevue Projects
- Our potential Alt Resources JV covering the **QSM project** tenements prospective for tin, tungsten, antimony, REE
- Our **Special Projects** which offer strategic positioning such as the Nightflower silver-lead-antimony project, Mt Molloy and Dimbulah copper projects and the exciting Beefwood copper-gold project.

Our early positioning in securing these projects is now paying off with the market increasingly focused on strategic and critical metals as well as attracting other corporate interest.

Appendix 1. Nightflower Silver Equivalents Calculation

Exploration Target reported on 9 September 2024. Note: The Exploration Target is conceptual in nature only and there is no guarantee that further exploration will define a resource. (RHS)

Bluespoint Mining Services Pty Ltd (BMS) was commissioned to remodel the mineralisation with wireframes to capture all the available data and establish an Exploration Target for future exploration.

Table on right outlines the exploration target tonnage and grades at various cut off grades to estimate the overall exploration target.

Recovery Assumptions

Right hand side table outlines the recovery assumptions presented in Askew Report on Stage 2 Reserves (1991), commissioned by Risla Enterprises Pty Ltd. These recoveries have been used by the Company in estimating the recovery factors used in the Ag Eq estimations.

The Pb concentrate is expected to be a saleable product and with the contained metals listed above being payable. *Figure 93 Metal recoveries. Source: Askew 1991 in Surestone Pty Ltd's First Annual Report on EPM 6899 by Brett Duck in 1991.*

Metal Prices

The table below provides the silver equivalents (Ag Eq) calculation using 2024 metal prices to 6 September 2024 (an approximation for Sb), the recoveries cited above and the upper and lower grade range estimations from BMS for the Exploration Target.

Metal	Average Metal Prices 2024 (to-date)		Recovery (Source: Askew 1991)	Lower Grade Range Estimate (g/t or %)	Recovered Value (US\$)	Upper Grade Range Estimate (g/t or %)	Recovered Value (US\$)
Ag	27	US\$/oz	90%	89	70	146	114
Au	2265	US\$/oz	70%	0.42	21	0.35	18
Cu	9241	US\$/t	80%	0.13%	10	0.23%	17
Zn	2710	US\$/t	30%	1.09%	9	1.50%	12
Pb	2135	US\$/t	90%	2.33%	45	3.89%	75
Sb	10000	US\$/t	80%	1.00%	80	1.00%	80
Total Recovered Value (US\$/t)					234		316
Silver Equivalents (Ag Eq)					270		364

Exploration Target Tonnage		Ag Grade (g/t)		Sb Grade (%)		Ag Eq (g/t)		Ag Eq Contained Metal	
Low	High	Low	High	Low	High	Low	High	Low (Moz)	High (Moz)
2,749,081	5,360,372	89	146	1%	1%	270	364	32.2	46.6

(Ag Eq = Ag (g/t) + 65 x Au (g/t) + 95 x Cu (%) + 10 x Zn (%) + 25 x Pb (%) + 102 * Sb (%))

Cutoff Ag (g/t)	Tonnage (t)	Ag grade (g/t)	Au grade (g/t)	Cu %	Pb %	Zn %	Sb %
0	7,332,131	67	0.34	0.1%	1.8%	0.9%	1.0%
25	5,360,372	89	0.42	0.1%	2.3%	1.1%	1.0%
50	3,243,848	130	0.37	0.2%	3.5%	1.4%	1.0%
75	2,873,043	142	0.36	0.2%	3.8%	1.5%	1.0%
100	2,749,081	146	0.35	0.2%	3.9%	1.5%	1.0%

Note: The Exploration Target is conceptual in nature only and there is no guarantee that further exploration will define a resource.

Expected Recoveries as reported by Askew 1991

Recoveries	Pb to Pb concentrate	91%
	Ag to Pb concentrate	90%
	Au to Pb concentrate	70%
	Zn to Pb concentrate	30%
	Sb to Pb concentrate	80%
	Pb Concentrate grade	42% Pb

Based on run of mine ore with the following head grades:

Pb	5.30%
Ag	183 g/t
Au	0.7 g/t
Zn	3.0%
Sb	1.0%

See ASX announcement dated 6 September 2024

Appendix 2. References to previous announcements

The previously reported exploration information includes Tartana's ASX releases of:

- 26 May 2021: R3D Resources Prospectus
- 9 February 2023; Tartana Copper Resource increase to 45,000 tonnes
- 14 February 2023: Maiden Queen Grade Zinc Resource
- 20 February 2023: Mountain Maid Gold Resource Upgrade
- 18 October 2024: Tartana proposes to acquire critical minerals project portfolio
- 30 October 2025: Gold mineral resources now exceed 1Moz in Cardross-Maid area
- 27 January 2026: Copper Silver and Indium Assays confirm Scope for By-Product credits in Cardross
- 11 February 2026: Montalbion further expands Tartana's silver project footprint
- 27 February 2026: Over 6,000m of drilling targeting maiden Silver MRE
